DETAILED ACTION

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

1. The prior art teaches of a mold that is used to form an encapsulant around a semiconductor device where the mold forms a first surface of the encapsulant to be on top of and over the chip and a second surface that is below the top surface of the chip, but above the active surface of the chip. The prior art does not teach the above teachings with the first surface of the encapsulant to start above the active surface, but below the top surface of the chip in combination with the second surface of the encapsulant to be formed below the top surface of the chip parallel planar to the top surface of the chip.
2. The prior art also teaches of a mold that is used to form an encapsulant around a semiconductor chip where the mold forms a first surface of the encapsulant to start above the active surface, but below the top surface of the chip in combination with the second surface of the encapsulant to be formed below the top surface of the chip. The prior art does not teach the above teachings in combination with the encapsulant's second surface to be parallel planar to the top surface of the chip. This combination has been found to be non-obvious thus allowed.
3. Claims 20-24 and 26-30 are allowed.
